i-CORDS

i-Cords are round cords which can be used for ties, handles, toys or just for embellishment.

An i-Cord is similar to French knitting but is much more flexible in size and stitch numbers.

Using 2 double-pointed needles, cast on a few stitches (between 2 and 6, depending on the yarn thickness).

Knit the first row.

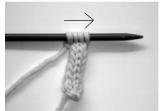

At the end of the row, instead of turning your work for the next row, slip the stitches to the other end of the needle.

Pull the yarn firmly across the back of the stitches to knit the next row from the same direction as the first row.

Continue knitting every row in the same direction, pulling the yarn firmly across the back.

When cord is length required either cast off the stitches or break the yarn, thread the end through the stitches and secure firmly.
