

WOOLWIND/INTARSIA

This technique is used to knit blocks of different colours, avoiding the extra bulk of Fair Isle knitting. When using this method, you will need a separate ball for each section of colour. The colour twist method involves twisting the different coloured yarns over each other to prevent holes. Twist the colour to be used underneath and to the right of the colour just used. Always change colours on the wrong side of the work so colour change does not show on right side.
